

Bing Image API (only bcs that Google image is deprecated)

*I list those examples in order to show some different aspects of this image search.
Feel free to change with anything in-line with those instruction.

Show me a dog

- Cuz presentation always needs some dogs.

Show me a dog

- Repeat to show that same instruction can have different results.
- *There are only 1/10 chance to get same image.

Show me a cat (*special case)

- “Sometimes, this intelligent assistant will refuse to give you result.”

Show me the father of Jaime Lannister

- Demo that this works for compound sentence.

Show me Excalibur

- Shows that this works for uncommon words.

Avada Kedavra!

- And... it even works for spells
- “Excuse me”

“Mirror mirror on the wall, who’s the fairest of them all?”

- Zune’s image appears... (just thought about this lol...)

ITunes API Integration

Play Me *Viva La Vida

- Show that this works with any song names
- The spinning disk is made by us.

*(While playing)

Music Pause

- Show that we can pause the music/stop the spinning disk.

Music Play

- Back to playing

*(Wait music to finish playing, about 15 seconds.)
